Navansh Mahajan

Digital Transformation Architect @ Nokia | Technical Presales,
Microsoft Power Platform, Power Automate, Power Apps, Power BI
Munich, Bavaria, Germany

Summary

Power Platform Problem Solver | Driving Business Value with
Automation

As a passionate Microsoft Power Platform expert, I thrive on tackling complex business challenges and delivering innovative solutions that unlock efficiency and growth. Here are some of the ways I've leveraged the Power Platform's capabilities to achieve significant results:

Enhanced Security and Streamlined User Experience: Migrated an Excel tool with exposed logic to Power Apps with a secure backend, implemented dynamic updates, and automated manual processes, resulting in improved data security, user experience, and reduced development needs.

Real-Time Pricing for Accurate Quotes: Implemented a Power Platform solution to connect to a secure SQL Server for real-time pricing updates, eliminating outdated quotes, reducing pricing discrepancies by 80%, empowering sales teams, and boosting revenue opportunities.

Expanded Configurability and Customer Reach: Leveraged Power Apps, Power Automate, and Office Scripts to create a multi-configurable solution from a single-configuration Excel tool. This increased customer reach by 100%, streamlined workflows through automation, and showcased the Power Platform's ability to extend tool functionality.

Streamlined User Provisioning and Enhanced Security: Optimized a Power Automate flow to efficiently synchronize user access between Microsoft Entra and Salesforce, reducing synchronization time from 8 hours to 15 minutes. This ensures accurate user access, restricts

Power BI data access to authorized users, and improves overall security and efficiency.

These accomplishments demonstrate my ability to leverage the Power Platform's versatility to solve complex challenges and deliver measurable business value. Connect with me to discuss your specific needs and how I can help you achieve your goals!

Experience

Nokia

8 years 5 months

Digital Transformation Architect

December 2020 - Present (4 years 3 months)

Noida, Uttar Pradesh, India

Expertise in developing and implementing Microsoft Power Platform projects, automating workflows, and creating Proof of Concept (PoC) demos.
