WORK EXPERIENCE

Digital Transformation Architect

Dec 2020 – August 2025

Nokia Solutions and Networks, Noida, India

- Owned enterprise **Power BI** and **Power Platform** solutions supporting **Sales, Legal, Finance** and **Operations** across **10000+ users**.
- Designed and maintained executive dashboards tracking revenue, cost, adoption and performance KPIs across multiple business units.
- Developed reusable **DAX** measures and optimized data models improving report performance and reliability by over **50%**.
- Built certified datasets to serve as single source of truth ensuring metric consistency and governance standards.
- Reduced Power BI access provisioning time from **8 hours to 15 minutes** by automating Entra ID and Salesforce sync using Power Automate.
- Replaced legacy Excel tools with secure Power Apps solutions integrated with SharePoint and SQL Server **reducing manual errors by 80%**.
- Designed SQL Server pricing engine integrated through Power Automate Gateway **reducing quote errors by 75%**.
- Delivered configurable global quoting platform **increasing coverage by 70%** and improving reporting transparency.
- Automated document generation using Power Automate and Word connectors reducing preparation time from **3 hours to 10 minutes**.
- Introduced platform governance including environment strategy, role-based access control and workflow standardization.
- Built usage and adoption analytics dashboards enabling leadership to monitor platform performance in near real time.
- Drove analytics initiatives combining process data, system data and user behavior data to support strategic decisions.
- Led a team of 10 developers and ensured quality delivery of analytics and automation solutions. Maintained governance standards and supported platform adoption.

Senior Solutions Specialist

Oct 2016 - Dec 2020

Nokia Solutions and Networks, Noida, India

- Led **solution design and bid management** for large-scale licensing, maintenance and consulting

projects across 50+ global markets.

- Managed **end-to-end bid proposal lifecycle** including RFP/RFQ responses, Statements of Compliance and pricing quotations. Ensured full compliance and accuracy.
- **Optimized pricing models** and developed cost-effective deployment strategies with cross-functional teams to strengthen Nokia's competitive positioning.
- **Leveraged analytics** to align portfolio strategy, sales targets and product direction. Collaborated closely with Product Management and R&D.
- Supported **Sales and Account Managers** with customized proposals. Drove higher win rates and client satisfaction.

Senior SRF Engineer

July 2013 - Oct 2016

Ericsson India Global Services, Noida, India

- Led **Airtel Africa's Gy migration** from SS7 to Diameter, improving efficiency and enabling real-time charging.
- Delivered **Location-Aware Refill (LAR)** feature via AIR/IVR, enhancing targeting and customer experience.
- **Automated subscriber data migration using custom Bash scripts** on Linux/SPARC, raising throughput from 1 M to 4 M users in 4 h.

Senior Packet Core Engineer

Apr 2010 - Jul 2013

Nokia Siemens Networks, Noida, India

- Reduced node commissioning time by **50 %** using Excel-based automation.
- Developed KPI-based **fault detection tool logic** for faster troubleshooting.
- Performed analytics and optimization on Packet Core elements.

AWARDS AND RECOGNITION
